

MindX Blood Testing

Thank you for your interest in MindX Blood Testing. A doctor or other prescriber needs to order this testing. See prescription form download on the MindX product order page (<https://mindxsciences.com/productorder/>)

Here is a list of our peer-reviewed publications:

<https://mindxsciences.com/publications/>

And here is information about the 7 blood tests we are currently offering: <https://mindxsciences.com/bloodtests/>

The MindX Blood Test is currently patient self-pay, and costs \$1,999 list price with one disease report (or \$97 a month/ 24 months in installments). Extra disease reports are \$499 each.

Please contact info@mindxsciences.com

After payment, we will FedEx the test kit to the patient directly, and we can arrange for at home mobile blood draw if the doctor does not have a designated blood draw place. MindX will provide the test results to the doctor approximately 4 weeks after the blood draw. The doctor will get the results in an easy to interpret report and share them with the patient. The patient can also get a copy of the test results directly at that time. The test reports provide the doctor objective personalized information about disease severity and future risk, as well as personalized potential medication choices and nutraceutical choices. If the doctor needs some guidance on interpreting the results, we can arrange a free 15-minute consultation with a MindX MD.

We also recommend you download and use our Life x Mind app; it will help you and your doctor keep track of how you feel in between appointments: <https://mindxsciences.com/lifexmind/>
